

# Hinsdale Park

## Walking Trail

Hinsdale Park, located on Old South Road, is a multi-use area containing mowed playing fields, a labyrinth and a trail system. From the parking area, a single trailhead leads to the labyrinth and a forested loop, which includes a connection to the Milestone Road bike path and the Land Bank's Milestone Crossing trail on the north side of Milestone Road.

The trees on the Hinsdale Property are primarily pitch pine, which are native to the eastern United States, but were most likely introduced to Nantucket in 1847 by Josiah Sturgis who planted them along the Milestone Road to serve as a windbreak. This species quickly spread and is now one of the most common trees on Nantucket.

**Directions:** From the rotary, go out Old South Road and take your first dirt road on the left after Forest Avenue. There is a parking area a short distance down the dirt road.

### SAFETY

The Nantucket Land Bank accepts no liability due to injury resulting from use of this map or its properties.

### LEAVE NO TRACE

In most cases, there are no trash receptacles provided at these properties, so please help keep our properties clean by taking everything that you brought with you when you leave.

### PET OWNERS

Dogs are allowed on beaches and trails but we ask that you please pick up after your dog. There is a leash law on Nantucket.
